Cutting fluids	packing stem grease	threads and collars
Asphalten removal	puck marks on glass	racquet ball marks
Pitch removal	asphalt removal	

Directions for use

Cleansweep 3 is an oxygenated Solvent replacement that will last three to four times as long as the chemicals in the industry today and will clean more effectively. Our product has no Benzene, Toluene, and Xylene and is biodegradable. Cleansweep 3 is non-caustic, non-flammable and will offer a safe environment for all concerned. Just pour Cleansweep 3 directly into your parts washer. Heavy grease will sink to the bottom and the light oils will float to the top where they can be skimmed off. In solvent based product the oils and solids emulsify in the product contaminating and rendering it useless in a short period of time.

Cleansweep 3 can be used in pressure washers to clean drilling rig floors, steel buildings and ground matting, shop concrete floors. It also cleans all types of heavy machinery. Spray on concrete floors where oil has been present, let sit for 10 minutes then spray off with warm or cold water. If oil has been standing for a number of days, scrub with a brush and rinse again thoroughly.

Cleansweep 3 can be used in steam cleaners and pressure washers with either hot or cold water. The solution is effective when applied with a spray bottle followed by a scrub brush to agitate the affected areas.

Cleansweep 3 works great when removing oil, paint, blood, grease, heavy soil and deep set in stains from work clothes. Spray directly on the affected area of clothing, agitate, then add a ½ cup of **Cleansweep 3** to your laundry washing machine. On set in stains in your carpet, spray affected areas; agitate with brush, then cleanup with warm water and a clean dry cloth.

Cleansweep 3 works great on tile and grout, simply spray on stained areas, let stand for 2 to 3 minutes then rinse off. Tile will sparkle and grout will come back to its original color.

Cleansweep 3 works exceptionally well on pitch in the pulp and paper industry. **Just spray the area and rinse off immediately.** Other caustics would take two or three hours to scrape off.

Cleansweep 3 sprays directly on heavy equipment where grease or carbon built up is a problem, then rinses off.

Cleansweep 3 can be used to clean all areas in your car, from your dash to area mats that have set in stains. It also can be used on vinyl and leather upholstery with no staining or residue. **Cleansweep 3** takes bugs off automobiles and RVs in seconds. Spray on, then wipe with a clean dry cloth. **Cleansweep 3** can be sprayed on fiberglass boats and RVs then rinsed with cold or warm water. Your fiberglass will shine and will have no residue. Spray **Cleansweep 3** on chrome wheels; all the black dust from your brake lining will wash off with cold water.

Cleansweep 3 can be sprayed directly on ice rink glass to remove puck marks. Rinse with cold water.

Cleansweep 3 cleans up asphalt vehicles. Simply spray on, let stand for ten minutes, repeat the application; then rinse off with a pressure washer.

Cleansweep 3 is black light approved and is very effective on paraffins.

Cleansweep 3 can be used as a glass and a stainless steel cleaner. The product will have to be diluted 120 to 1.

There are a number of different industrial cleaning products on the market today, but the versatility of **Cleansweep 3** industrial cleaner speaks for itself.
